Discovery

Proposed Solution Overview

Phase 1: Basic Email Automation

Phase 2: Follow-ups & Intelligence

Investment & Timeline

Next Steps

The Current Reality

Executive Summary

The Current Reality: Your procurement team is manually sending confirmation emails to suppliers, tracking responses in spreadsheets, and chasing follow-ups through personal email accounts. This manual process creates delays, missed deadlines, and procurement bottlenecks that directly impact your production schedule.

Our Solution: Transform your supplier communication from reactive manual follow-ups to proactive, intelligent automation that ensures on-time delivery while freeing your team to focus on strategic supplier relationships.

The Current Reality

Manual Procurement Communication

Manual Email Creation: Individual emails crafted for each PO confirmation request +

Spreadsheet Tracking: Purchase orders tracked in Excel with no automated follow-up system +

Response Management: Supplier responses scattered across personal email accounts +

Deadline Tracking: Manual monitoring of delivery dates with reactive follow-ups +

No Visibility: Management lacks real-time view of supplier response rates and delivery commitments +

The Current Reality

Impact on Your Business

2-4 hours/week spent on manual email creation and timing management (190hrs+/year) +

Missed confirmation requests due to manual tracking of dates +

Inconsistent communication with suppliers affecting relationships +

Production planning uncertainty from delayed or missing confirmations +

No centralized visibility of PO confirmation status across the team +

Our Solution

Three-Phase Transformation Approach

Phase 1: Basic Email Automation

(2-3 Weeks)

Objective: Send automated emails in a centralized location

Phase 2: Follow-ups & Intelligence

(4-5 Weeks)

Objective: Response parsing and metrics capabilities

Phase 1: Basic Email Automation

Timeline: 2-3 weeks

What We'll Do:

- SharePoint Tracking System
- Single Email Automation
- Simple Manual Updates

Expected Results:

- **100% consistent timing** - no more missed or late confirmation requests
- **Professional communication** - standardized emails every time
- **Team collaboration** - shared visibility instead of individual Excel files
- **Time savings** - 2-4 hours/week in manual email creation
- **Reliable process** - system handles the timing automatically

Investment : \$1500

Phase 1: Basic Email Automation

What We'll Build:

1. SharePoint Tracking System

- **Replace your Excel** file with a SharePoint list that multiple people can update
- **Simple status tracking:** Pending, Sent, Confirmed
- **Automatic email trigger** based on your "Request Delivery Date" calculation
- **Supplier contact database** with email addresses

2. Single Email Automation

- **Power Automate flow** that automatically sends confirmation email on the calculated due date
- **Professional email template** with your company branding
- **Personalized content** including PO details, supplier info, and delivery dates from your spreadsheet
- **Automatic status update** to "Sent" when email goes out

3. Simple Manual Updates

- **Easy status changes** in SharePoint when suppliers respond
- **Team visibility** - everyone can see which POs have been sent and confirmed
- **No complex workflows** - just automated sending on the right date

Phase 2: Follow-ups & Intelligence

Timeline: 4-5 weeks

What We'll Do:

- Smart Follow-up System
- Management Dashboard (Power BI)
- Response Intelligence

Expected Results:

- **Proactive follow-up management** with automated reminder sequences
- **Supplier performance** insights for better vendor relationships
- **Management dashboard** for real-time procurement visibility
- **Response automation** reducing manual status updates
- **Predictive supplier analytics** for strategic procurement planning

Investment : \$6,500 - \$9,000 Available 30 days after Phase 1 completion

Phase 2: Follow-ups & Intelligence

What We'll Build:

1. Smart Follow-up System

- **Automated reminder emails** (7 days before delivery if not confirmed)
- **Urgent follow-ups** (3 days before delivery)
- **Escalation workflows** for overdue confirmations
- **Multiple contact management** (primary + escalation contacts per supplier)

2. Management Dashboard (Power BI)

- **Real-time visibility** into PO confirmation status by supplier
- **Supplier performance metrics** and response time tracking
- **Upcoming delivery dates** requiring attention
- **Executive reporting** with procurement KPIs

3. Response Intelligence

- **Email parsing** to automatically extract delivery confirmations
- **Automatic status updates** from supplier responses
- **Supplier reliability scoring** based on response patterns
- **Mobile interface** (Power Apps) for procurement team on-the-go

Technology Stack

Modern Microsoft 365 Solution

Phase 1: Core Automation	Phase 2: Advanced Intelligence
• SharePoint Online: Replace Excel with collaborative list • Power Automate: Smart email workflows and triggers • Outlook: Seamless integration with existing email system • Microsoft 365: Leverage tools you already have	• Power BI: Real-time dashboards and supplier analytics • Power Apps: Mobile interface for procurement team • Response parsing and data extraction • Advanced Analytics

Timeline

Phase 1: Foundation (Weeks 1-3)

Tasks	
Week 1: Discovery & Setup	• Review current Excel process and supplier contact list • Set up SharePoint list structure matching your current data • Design professional email template with your branding
Week 2: Development & Testing	• Build Power Automate workflow for automatic email sending • Configure trigger based on "Request Delivery Date" calculation • Test with sample PO data to ensure timing works correctly
Week 3: Deployment & Training	• Import existing PO data to SharePoint • Train team on simple status updates (Pending → Sent → Confirmed) • Go-live with automated email system

Return on Investment

Your Investment Pays for Itself

Phase 1 Investment: \$1,500

- **Time Savings:** 2-4 hours/week × \$7/hour = \$728 - \$1,456 annually
- **Process Reliability:** Never miss a confirmation request = \$2,000 - \$4,000 in avoided delays
- **Payback Period:** 4-6 months

Phase 2 Investment: \$6,500 - \$9,000

- **Follow-up Automation:** Additional 2-3 hours/week saved = \$728 - \$1,092 annually
- **Management Visibility:** Data-driven supplier decisions = 3% procurement cost savings
- **Supplier Performance Optimization:** Better negotiations = \$5,000+ annually

Total System Value: \$9,000 - \$15,000+ annually in measurable benefits

Implementation Approach

We Understand the Risks

Our Safeguards:

- Backup everything before changes
- Test thoroughly at each step
- Document extensively
- Train comprehensively
- Support continuously

Your Protection:

- Fixed scope agreement
- Change request process
- 30-day satisfaction guarantee
- Phased payments

Next Steps

Let's Start Your Transformation

Immediate Actions:

1. Approve Phase 1 proposal
2. Schedule kickoff meeting
3. Identify key stakeholders
4. Plan go-live date

Phase 1 Timeline:

- **Week 1:** Discovery and SharePoint setup
- **Week 2:** Email automation development and testing
- **Week 3:** Data migration, team training, and go-live
- **Week 4:** Optimization and performance monitoring
